

Guide to Use Fake News detection plugin

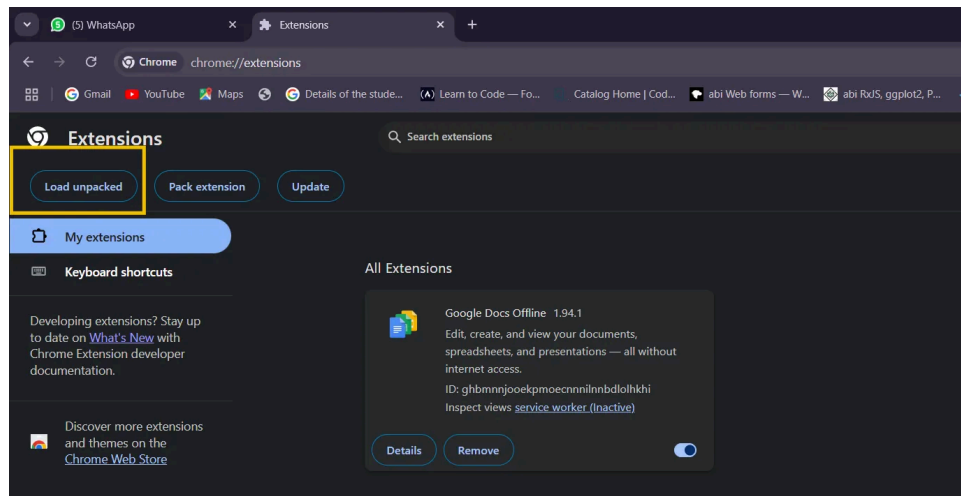

1. Unzip the downloaded folder.
2. Open Chrome and navigate to `chrome://extensions/`
 - a. In the address bar, type or paste "`chrome://extensions/`" and then press Enter.

3. Turn on **Developer mode** (toggle in the top right corner).

4. Click "**Load unpacked**".

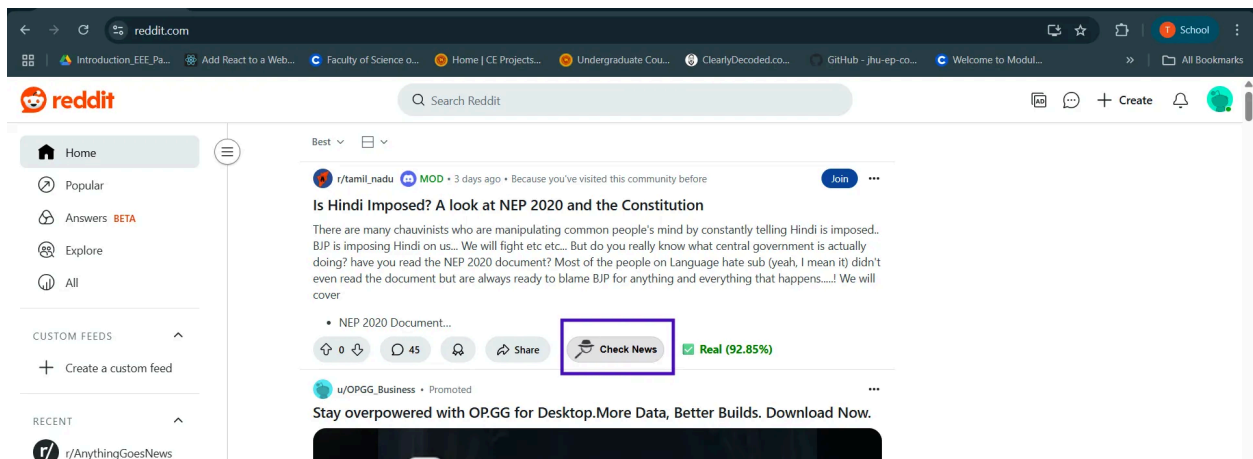

5. Select the unzipped plugin folder.

6. The plugin should now be installed and active.

7. Please visit any Reddit post page. (<https://www.reddit.com/>)

8. Click the "**Check News**" button near the **Share** button to analyze the post.

It will take some time before we see results.
